Sebastian Strzałkowski

Senior DLT Engineer & Blockchain Architect

Warsaw, Poland • +48 661 312 648 • sebastian.strzalkowski@i-can-do.it • LinkedIn

PROFESSIONAL SUMMARY

Senior DLT Engineer & Blockchain Architect with over 8 years of engineering experience, specializing in secure on-chain protocol design, smart contract architecture (EVM / Solidity / Casper / Hyperledger), and enterprise-grade banking and decentralized finance (DeFi) solutions. Proven track record combining deep Web3 domain expertise (consensus mechanisms, Layer 2 rollups, RWA tokenization, Tatum/Fireblocks custody rails) with distributed systems engineering and AI-accelerated development practices (LLM Gateway, Model Context Protocol, Spec-Driven Development). Active tech conference speaker, mentor, and Ethereum ecosystem educator.

CORE COMPETENCIES & TECHNICAL SKILLS

- **DLT, Blockchain & Smart Contracts:** Solidity, EVM Architecture, Ethereum, Layer 2 Rollups (Base, Polygon), Casper Network (Rust), Smart Contract Security & Auditing, Gas Optimization, Hardhat, Foundry, Web3j, ERC Standards (ERC-20, ERC-721, ERC-1155), Escrow Mechanisms, Non-custodial Liquidity Protocols.
- **Enterprise Blockchain & Digital Assets:** Hyperledger (Besu/Fabric), Kaleido BaaS, Real World Assets (RWA) Tokenization, Tatum, Fireblocks Custody Rails, Institutional Integration Patterns, Private/Permissioned Networks.
- **Backend & Distributed Systems:** Java (17, 21), Spring Boot (3, 4), Apache Flink (Stream Processing), Project Reactor (Reactive Programming, WebFlux), Microservices, Domain-Driven Design (DDD), Event Storming, CQRS / Event Sourcing, REST APIs, WebSockets.
- **Databases & Data Architecture:** PostgreSQL, PostGIS (Spatial Data Optimization), Redis, Zero-downtime Database Migrations (Sybase to PostgreSQL), High Availability (HA).
- **Cloud & DevOps Infrastructure:** AWS, Terraform (Infrastructure as Code), Docker, Kubernetes, GitHub Actions (CI/CD), RPC Nodes & High Availability Infrastructure.
- **AI-Accelerated Engineering:** Model Context Protocol (MCP), LLM Gateway & Security, Spec-Driven Development, RAG Knowledge Architectures, Antigravity, Claude, GitHub Copilot.

PROFESSIONAL EXPERIENCE

GFT — Senior DLT Engineer

08.2026 – Present | Warsaw, Poland

- Delivered to production a flagship institutional **Tokenised Deposits** platform for a leading global Tier-1 bank, enabling 24/7 real-time interbank/intragroup settlements, corporate treasury liquidity management, and tokenized RWA/MMF workflows.
- Lead the architectural design and implementation of enterprise distributed ledgers using Hyperledger and the Kaleido BaaS platform, integrating with wholesale CBDC settlement rails and institutional custody providers (Fireblocks).
- Author institutional technical proposals and design secure on-chain & off-chain integration patterns connecting core banking systems with DLT networks.
- Evaluate custody infrastructure, security compliance, and smart contract audit standards; conduct technical recruitment interviews and mentor engineers transitioning into DLT.

Environment: Hyperledger, Kaleido BaaS, Tokenised Deposits & RWA, Fireblocks, Wholesale CBDC Rails, Ethereum/EVM, Java 21, Spring Boot.

ASTEK — DLT Engineer

08.2025 – 08.2026 | Warsaw, Poland

- Developed and deployed enterprise banking solutions built on Distributed Ledger Technology (DLT) and blockchain.
- Architected digital asset tokenization platforms for Real-World Assets (RWA), enabling direct integration with core banking systems.
- Provided technical and strategic advisory on blockchain adoption, consensus mechanics, and cryptographic security standards.
- Conducted technical recruitment interviews and mentored engineering teams in the DLT domain.

Environment: DLT, RWA Tokenization, Solidity, Smart Contracts, Core Banking Integration, Java, System Architecture.

Inetum - Telco — Software Developer

09.2024 – 07.2025 | Warsaw, Poland

- Led data architecture design and performance optimization for large-scale, high-load telecommunications systems.
- Worked extensively with PostgreSQL and PostGIS to optimize spatial querying and large-scale telecommunications datasets.
- Planned and executed a zero-downtime database migration from legacy Sybase to PostgreSQL, guaranteeing strict transactional integrity and High Availability (HA).

Environment: PostgreSQL, PostGIS, Sybase, Database Migration, High Availability, Java, Performance Tuning.

Inetum - IoT — **Software Developer** *01.2024 – 07.2024* | Warsaw, Poland

- Designed and built resilient, high-throughput microservices for a real-time IoT vehicle tracking and fleet telemetry platform.
- Implemented high-performance APIs handling massive streams of continuous telemetry data with low latency.
- Integrated distributed messaging systems, ensuring fault-tolerant ingestion and real-time processing under peak loads.

Environment: Java 17, Spring Boot, IoT Telemetry, Distributed Systems, High-Throughput APIs, Messaging Queues.

Inetum - Cloud — **Software Developer** *07.2022 – 01.2024* | Warsaw, Poland

- Architected and implemented large-scale cloud stream processing applications on AWS using Apache Flink and Project Reactor (reactive programming).
- Automated and maintained entire cloud infrastructure through Infrastructure as Code (IaC) with Terraform.
- Optimized real-time event pipelines for high scalability, efficient backpressure handling, state management, and minimal latency.

Environment: AWS, Apache Flink, Project Reactor (Reactive Programming), Java, Terraform, Kafka, Stream Processing.

Inetum - Telco CRM — **Software Developer** *07.2018 – 07.2022* | Warsaw, Poland

- Developed core CRM enterprise modules for telecommunications and IoT systems, supporting high transactional volume.
- Engineered complex enterprise system integrations, focusing on fault tolerance, heavy load resilience, and system uptime.
- Collaborated directly with business and product stakeholders to translate requirements into robust technical specifications.

Environment: Java, Spring, Microservices, Enterprise CRM, Oracle/PostgreSQL, REST APIs.

FEATURED WEB3 & SIDE PROJECTS

MaluchTracker (maluchtracker.pl) — **Founder & Developer** *05.2026 – Present*

- Designed and built solo a mobile baby tracker for parents, published on Google Play in Polish, English and Ukrainian: feeding, sleep, diapers, diet, WHO growth charts, developmental leaps and feeding predictions.
- Clean Architecture (ports and adapters) with automated architecture checks, unit and BDD tests, and end-to-end tests on Android (Maestro).
- Privacy by design: data stays on the device, no account, no ads, opt-in analytics only.
- Release pipeline with EAS Build/Submit and GitHub Actions; AI-agent-driven development workflow.

Tech Stack: React Native, Expo, TypeScript, Clean Architecture, AsyncStorage, Firebase Analytics, EAS, GitHub Actions, Maestro.

Liqfinity (liqfinity.com) — **CTO** *06.2024 – 10.2025*

- Architected a non-custodial Decentralized Finance (DeFi) protocol with automated liquidity pool integrations and on-chain risk mitigation models.
- Designed and provisioned automated AWS cloud infrastructure via Terraform (IaC).
- Provided technical team leadership, overseeing smart contract development in Solidity, security audits, and continuous delivery.

Tech Stack: DeFi Protocols, Solidity, AWS, Terraform, Cloud Infrastructure, Risk Management.

Bored Founders Club (boredfoundersclub.pl) — **Blockchain Mentor & Advisor** *01.2023 – 09.2023*

- Technical mentor for an active Web3 developer community.
- Conducted regular technical workshops on writing secure smart contracts in Solidity, EVM security principles, ERC token standards, and dApp-blockchain integrations.

Tech Stack: Solidity, Smart Contracts, EVM, Web3, Security Auditing, Mentoring.

Wennect (wennect.com) — **Blockchain Advisor & Smart Contract Engineer** *12.2022 – 09.2023*

- Architected smart contracts in Solidity for a next-gen talent marketplace powered by EVM blockchain.
- Designed trustless escrow mechanisms and provided strategic technical advisory on Web3 system architecture and decentralization.

Tech Stack: Solidity, EVM, Smart Contracts, Escrow Mechanisms, Web3 Advisory.

Mystra (mystra.io) — **Blockchain Lead Developer** *02.2022 – 07.2022*

- Built an NFT ecosystem on the enterprise-grade Casper Network (Layer 1 Proof-of-Stake).
- Implemented smart contract logic in Rust and designed hybrid off-chain microservices/bots in Java 11.
- Led a 2-developer team responsible for on-chain contract testing and off-chain service integration.

Tech Stack: Casper Network (PoS), Rust, Smart Contracts, Java 11, NFT, Team Leadership.

MetaDriverseClub — **Blockchain Architect** *06.2022 – 08.2023*

- Architected a decentralized membership and automotive asset tokenization platform (NFT) on Ethereum.
- Designed ERC-721 and ERC-1155 smart contracts, on-chain permission mechanics, and secure minting workflows.

Tech Stack: Ethereum, NFT (ERC-721/1155), Solidity, Smart Contracts, Web3.

Adchitects — **Smart Contract Engineer** *05.2021 – 02.2022*

- Designed smart contracts for an Ethereum-based decentralized NFT marketplace.
- Optimized contract architecture for minimal gas consumption and handled on-chain transaction settlement.

Tech Stack: Solidity, Ethereum, NFT Marketplace, Smart Contracts, Gas Optimization.

PUBLIC SPEAKING & CONFERENCES

Wednesday Market Debates #4 *11.03.2026* | Warsaw, Poland

Panelist: "Ethereum in 2026: Hit or Flop?" (Cashify & Warsaw Enterprise Institute). Addressed Layer 2 scalability, the "Better Bitcoin" narrative, and network economic fundamentals.

JVMDays Poznań 2025 *26.03.2025* | Poznań, Poland

Speaker & Workshop Host: "Ethereum Smart Contracts" — Hands-on workshop covering Solidity basics, Java-Ethereum communication via Web3j, token standards, and testnet deployments.

Fiesta BFC 2023 *02.06.2023* | Warsaw, Poland

Speaker: "Who will dethronize Ethereum?" — In-depth architectural comparison of competing Layer 1 ecosystems (Solana, Casper, EVM rollups).

Blockchain Alliance Opener 2022 *03.09.2022* | Warsaw, Poland

Speaker: "Web2 vs Web3: Technological & Business Aspects" — Comparative analysis of traditional web infrastructure vs blockchain protocols.

Web3 Devs Poland Meetup *23.07.2022* | Kraków, Poland

Speaker: "WEB3 Application Architecture" — Architectural deep dive into the OpenSea protocol, data flows, and frontend-contract integration.

CONTINUOUS PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

Architect of Tomorrow (Architekt Jutra) • **Devstyle** • **Certified** *11.10.2026 • 33 hours*

Focus: Enterprise AI Architecture, Model Context Protocol (MCP), LLM Gateway & Security, RAG & Knowledge Architectures, Hexagonal Architecture, Spec-Driven Development, Observability & Cost Optimization.

Developer of Tomorrow (Developer Jutra) • **Devstyle** • **Certified** *18.07.2025 • 10 weeks*

Focus: Full-Stack Development, AI/LLM Integration, Architecture, DevOps, Product Engineering, Event Storming.

Leader's Horizon (Horyzont Lidera) • **Devstyle** • **Certified** *27.06.2025 • 12 weeks*

Focus: Technical Leadership, Cross-functional Communication, Team Management, IT-Business Alignment.

Craftsmanship - Professional's Toolkit • **Bottega IT Minds** • **Certified** *22.01.2025 • 3 days*

Focus: SOLID, GRASP, Domain-Driven Design (DDD), Hexagonal Architecture, Clean Code, TDD, Refactoring.

Apache Flink for Stream Processing • **Ververica** • **Certified** *02.08.2022 • 3 days*

Focus: Stateful Stream Processing, Event Time Semantics, Checkpointing, Kafka Integration, Flink SQL.

Reactive Programming in Java • **Bottega IT Minds** • **Certified** *17.11.2021 • 3 days*

Focus: Project Reactor, Spring WebFlux, Mono/Flux, RSocket, R2DBC, Non-blocking I/O.

Path of Modern Architect (Droga Nowoczesnego Architekta) • **Devstyle** • **Certified** *24.03.2021 • 6 months*

Focus: Strategic & Tactical DDD, Event Storming, Microservices, Event Sourcing, CQRS, Kubernetes, CI/CD.

EDUCATION

Military University of Technology in Warsaw (Wojskowa Akademia Techniczna w Warszawie) Warsaw, Poland

Bachelor of Science in Engineering (B.Sc. Eng.) — Electronics and Telecommunications

Degree equivalent: *Inżynier Elektroniki i Telekomunikacji*

I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process in accordance with Art. 6(1)(a) of the Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 (GDPR).
